LCR Meter Model 875B

The rugged 875B LCR meter is a reliable, easy-to-use workhorse that will measure inductors, resistors, and capacitors quickly and accurately. Utilizing special circuitry, the measurement more closely replicates true in-circuit measurements. The meter allows for resistance measurement down to 1 mΩ of resolution and zero adjustment for removing lead resistance.

Features & Benefits

- Precision measurement of very low resistances
- Measures D (dissipation factor)
- Unique drop-proof construction
- Tilt stand
- Measures resistance using a test frequency that can cause an inductive reactance
